

# HOW MUCH LONGER CAN YOU WAIT?

nationalgrid

CLEAR RIVER  
ENERGY CENTER

## RATE INCREASE

If Clear River were online today, the 53% National Grid rate increase you're facing would be more like 35%.

53%

vs

35%

## PER kW INCREASE

Rather than raising your rates 3.2 cents a kilowatt hour, the increase would be just 2.2 cents.

3.2¢

vs

2.2¢

## BILL INCREASE

That means your monthly bill would increase a little more than \$11.69 versus the current \$17.

\$17

vs

\$11

The thing is, we need to get started today. Rhode Island needs more affordable energy resources. You need to pay a fair rate for your power. **We all need Clear River Energy Center.**

YEARLY SAVINGS

\$63.72

# I AM **NOT** POWERLESS

I will not just sit back and watch my electric bill more than double.

I am not going to let short sighted, not-in-my-backyard people speak for me, hurting both my wallet and my state.

I've done the hard work, the research. I know that Rhode Island pays the second highest electric rates in the continental US. I know that New England's electric grid is facing a 10,000 megawatt shortfall, and our rates will continue to rise if we don't find new, cleaner, more efficient energy options.

I support the Clear River Energy Center.

**I am not powerless against the rising cost of electricity. Are you?**

I AM NOT POWERLESS AGAINST THE RISING COST OF ELECTRICITY. ARE YOU?

I SUPPORT THE

**CLEAR RIVER**  
ENERGY CENTER

# I AM **NOT** POWERLESS

I own a business. I choose to be here in Rhode Island. This is my home.

But I will not simply accept these huge increases in my electric bill.

My state pays the second highest rates in the continental United States, and now they're getting even higher. That's impacting my ability to invest in my business and my employees. And it's affecting my confidence in my state.

I'm behind the Clear River Energy Center.

**I am not powerless against the rising cost of electricity. Are you?**
